

### PROGET EMY433 2N

#### Remote-to-Remote programming:

1. Open the casing of your existing remote control which must be in good working order
2. You will see a row of small programmable numbered switches. They are in ON or OFF position.
3. Open the casing of your new remote; you will see a row of small programmable numbered switches.
4. Set them in the same way as those set in your existing remote.
5. Your new remote control is programmed

#### Programming with the receiver

1. Open the casing of your receiver. It is located next to your motor.
2. On the receiver circuit board, you will see a row of small programmable switches. They are in the ON or OFF position.
3. Open the casing of your new remote; you will see a row of small programmable numbered switches.
4. Set them in the same way as those set in the receiver
5. Your new remote control is programmed
