

### ADYX ALIZE EM4C

Step 1: Press button A and B continuously until LED flashes 3 times

Release button B (Keep pressing button A), and press button B Slowly for 3 times, the LED flashes

Release button A

**If light flashes when pressing any button it means that the clearance process was not done correctly.**

**Repeat the process again**

Step 2: Copy code from original transmitter

Place the cloner remote and the original remote side by side. Make sure they are very close to each other.

Press simultaneously a button on your original remote and one of the buttons on the cloning remote and hold until the LED on the cloning remote flashes steadily.

The Blue LED will first flash 3 times quickly, then stops for a second, then flashes steadily.

Release both buttons
