

### ALLMATIC Tech 3

By means of a pointed object (example a paper clip) press the hidden key (n° 5) of the transmitter already previously learnt for about 1 second.

For about 2 seconds, press the key of the transmitter to be learnt.

**IMPORTANT** Remote learning is not recommended if, in the immediate vicinity, there are 2 or more receivers controlled by the same transmitter (for instance, key 1 learnt at first receiver and key 2 at the second receiver) because learning could be simultaneous.
