

## SEA COCCINELLA ROLL

**The following procedure is only possible if the radio transmitter and the radio receiver have not been blocked through the insertion of the contract code**

To add a new radio transmitter to the memory of the radio receiver operate as follows:

1. Put the radio transmitter next to the radio receiver (within the working range).
2. Press the hidden button situated on the MASTER transmitter (already functioning on the installation) with a pointed object. The LED will switch on to confirm the self- programming function.
3. Press on the MASTER transmitter the button you want to copy. The LED will blink to confirm the transmission of the data to the radio receiver, which will be ready to receive the code of a new radio transmitter.
4. Press on the new transmitter (within 5 sec.) the button which you want to memorize. If necessary, repeat the procedure for each button that you want to memorize.
