

V2 MATCH-B

Procedure for learning a code from another remote control (Fig.1)

1. Press at the same time 2 buttons of the MATCH transmitter for 3 seconds: one of the two buttons must be the button you want to program (e.g. T1), the other can be any of the other three buttons (e.g. T2)
2. After 3 seconds the led is steadily lit
3. Release the button T2 and after 1 second the button T1: programming is activated after 10 seconds
4. Move the source transmitter near the MATCH transmitter as in the figure
5. Press and hold the button of the source transmitter: the led of the MATCH flashes while it stores the code and turns off when programming is over

NOTE: if programming is not successful, the led of MATCH flashes twice quickly for 5 times
