

### JANE Q

- 1) Press the button 1 and 2 simultaneously (figure A). When the GREEN LED starts flashing, release the buttons. Note: When the LED is blinking, you only have 20 seconds to move to the second point.
- 2) Position JANE remote control and your original remote control head to head as shown in figure B.
- 3) Hold down the button on your original remote you want to duplicate first and then press the button you want to save on JANE
- 4) Note: JANE remote control will scan all frequencies. Once identified the right frequency, it acquires the code automatically. If you have a short original remote signal, you must keep sending the constant signal by repeatedly pressing the button.
- 5) Wait until the GREEN LED on the remote control finishes flashing and stays on. It turns off automatically. Note: This process takes about 8 seconds.
- 6) Release the button of each remote. To program the next button JANE; repeat all the steps of the SELF LEARNING by pressing a new button on your original remote
