

Self Learning programming

Each remote control has a unique radio signal, the receiver radio can connect from 1 to a million radio signals

General procedure:

1. Open your radio receiver
2. Press the pushbutton switch MEMO, REC, ENR or PROG on the radio card
3. NOTE: For some receivers, you must press MEMO button and then release it, for some receivers, the pushbutton must be kept pressed
4. The LED on your radio receiver blinks
5. Press for one second the button of your new remote control
6. Release the button
7. Wait until the LED of your receiver

Test your remote control

For some models of radio receivers, keeping the MEMO button pressed down for more than 5 seconds can erase all the previously memorized codes.

This procedure is general and cannot correspond to all the brands of remote controls
