#### **Programming using an old transmitter:**

To start the programming procedure, you must get close to your receiver unit

Take your existing working remote control and press with a paperclip the hidden button located in the center of your remote

The receiver emits a short "beep" sound

Press any button on your old remote control. The receiver emits a short "beep" sound and goes on programming mode

Press the button you want to program on your new remote control, the receiver emits two short beeps

Your new remote control is now programmed!

#### **Programming using the receiver:**

Open the receiver unit and press the "p" button (programming button), the LED flashes slowly

Press the button you want to program on your new remote control, the LED comes off

Simultaneously, release the "p" button on your receiver and the button on your new remote control, the LED starts flashing

Press again the same button on your new remote control, the LED comes off

Your new transmitter is now programmed!
