DEA GT2M/ DEA GT4M

1. Place your original remote and your new remote head to head
2. Press and hold "Button 1" on your new control. The LED on your new remote control will light up.
3. While holding "Button 1", press "Button 2" four times.
4. Release all of the buttons. The LED on your new remote control will flash slowly.
5. While the LED is flashing, press and hold a button on your old remote control until the LED on your Multi 2 remote flashes faster.
6. Release the button on your old remote
7. While the LED on your new remote flashes faster, press and hold a button on your new Multi 2 remote (button 1, 2, 3 or 4) until the LED on your new remote goes out.
8. You have now successfully cloned that button on your old remote into one of the buttons on your new one.
