

EXTEL ATEM2 / EXTEL ATEM5 / EXTEL ATEM3

- 1- Open the box of your radio receiver (located at the end of the antenna wire)
- 2- Briefly press the record button on the radio receiver board.
Depending on the model, it can be called: ENR, PROG, MEMO or REC...

Note: According to the receivers, there are two methods: a) you have to press and release the record button, or b) you have to press and hold the record button. On the radio board, the LED is on

- 3- Press the button on your new remote control for one to two seconds.
- 4- Release the button.
Depending on the model, the indicator on the radio board can be locked immediately or shut down within 10 seconds after programming.
