

ALLO
REMOTECONTROL

INSTRUCTIONS

GENIUS KILO

1. Take your working remote control and press and hold both buttons together until the light starts to flash
2. While the light is flashing, press and hold the button you normally use to operate your gate or door
3. Place your new remote control nose to nose with the working remote and press the button you wish to program
4. The LED emits 3 flashes
5. Your new remote control is now programmed
